

## Portable Helium Spray Set

# Helijet<sup>+</sup>

**Helijet<sup>+</sup> set : total leak testing versatility !**

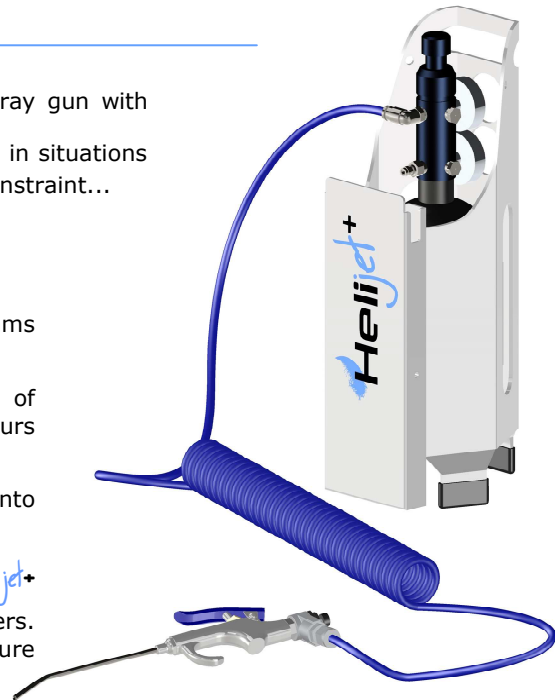

The **Helijet<sup>+</sup>** is an evolution of our *Helijet* ergonomic spray gun with built-in adjustable flow rate. It now offers a total portability, in situations where transporting a heavy and bulky helium cylinder is a constraint...

**Lightness**...featherweight, the set is less than 2 kilograms and easily carried on the shoulder.

**Autonomy**...pressurized to 200bar, this gives 160 liters of helium (at atmospheric pressure), ensuring more than 20 hours of normal leak testing .

**Cleanliness**...No need to take contaminated cylinders into clean environment !

**Economic**... One standard cylinder to refill all your **Helijet<sup>+</sup>**. You save money on leasing or purchasing numerous cylinders. A refill assembly with built-in relief valve and high-pressure quick-connect fitting does this for you !

### What's in **Helijet<sup>+</sup>** set ?

- ✦ A *Helijet* spray gun, with built-in adjustable flow-rate and flexible coiled tubing.
- ✦ A composite bottle, 0.8 liter capacity, maximum pressure 210 bars. Equipped with high pressure gauge and rupture disk overpressure protection.
- ✦ A coated aluminium alloy protective frame, with handle and gun storage compartment.
- ✦ A double-stage pressure regulator
- ✦ An adjustable shoulder strap
- ✦ A refill assembly, with built-in relief valve and DIN6/ Afnor C compatible fitting.

*Assembly compliant with 2010/35/EU Transportable Pressure Equipment European Directive.*
